Full stack web developer with experience in Ruby, Ruby on Rails, JavaScript, React/Redux. With a background in music, theatre, and dance, I have developed strong analytical and creative problem-solving skills that translated seamlessly into writing code. Now that I've entered this new and exciting world, I am looking to bring my creativity, love, and warmth from the stage to the screen. I would love to see that warmth thrive in non-profit, social justice, and arts-related environments as it would allow my past and my future to perfectly merge.
